

TWITTER TIMELINE SLIDER MODULE INSTALLATION AND USER GUIDE

Summary

This module is a utility to display your twitter timeline sliding in the footer, right/left columns or home page center column with your desired height, width and speed. It allows interactive options such as retweet, reply and favorite the tweets.

Installation

1. Upload the zip file you downloaded via the Back Office>Modules>Add a New Module tab then install.
2. You'll see a configuration link under the module's listing, click on it and open the configuration page.

Configuration

Configuration of the module can be done in three steps.

Step 1: Setup a Twitter Application

This process is easy and you will have a set of keys within a few minutes.

1. Visit <https://dev.twitter.com/apps/> and sign in using your Twitter username and password. This doesn't have to be the username or password of the stream you need access to, just a Twitter account you control.
2. Select 'Create new application' and enter the application details.
 - a. The name and description can be anything you like really, but you can't use 'Twitter' in the name.
 - b. The website field can be your main website and doesn't have to be the site where your Twitter feed or feeds are located.
 - c. Callback URL can be left blank
3. Enter the CAPTCHA info and click create
4. On the next details screen, click 'create my access token'.

Note: You may need to refresh the page after a few seconds if it doesn't appear automatically.

5. Make a note of the Consumer key, Consumer secret, Access token and Access token secret as highlighted below.

Organization

Information about the organization or company associated with your application. This information is optional.

Organization	None
Organization website	None

OAuth settings

Your application's OAuth settings. Keep the "Consumer secret" a secret. This key should never be human-readable in your application.

Access level	Read-only About the application permission model
Consumer key	
Consumer secret	
Request token URL	https://api.twitter.com/oauth/request_token
Authorize URL	https://api.twitter.com/oauth/authorize
Access token URL	https://api.twitter.com/oauth/access_token
Callback URL	None

Your access token

Use the access token string as your "oauth_token" and the access token secret as your "oauth_token_secret" to sign requests with your own Twitter account. Do not share your oauth_token_secret with anyone.

Access token	22751027-2a184a4039a047f79a2b3a2c2b6a201e
Access token secret	22751027-2a184a4039a047f79a2b3a2c2b6a201e
Access level	Read-only

[Recreate my access token](#)

Once you have an app setup within Twitter, this can be used for multiple user timelines on multiple websites – you do not need to setup one app per Twitter account or user timeline. Rate limits are set to 180 requests per 15-minute window however, per access token.

- Now open the configuration menu of the module by clicking on Backoffice>Modules>Twitter Timeline Slider>Configuration tab.

 BASIC SETTINGS

Twitter Username

megventure

username is your twitter handle, without the @ symbol. Ex: Megventure

Twitter Consumer Key

aHJAzNWxjVRe4fjEkclQ

Consumer key. Ex: Megventure

Twitter Consumer Secret

Op7gQZBuUkvHuuSi8ZweULpe0F3Fpdwrxw7DtFR0Z4

Consumer secret. Ex: Megventure

Twitter Access Token

855176100-dWfeg72peI57HM7o3HyRZ38wFP7kQwKvFT5CsRrO

Access Token. Ex: Megventure

Twitter Access Token Secret

o5Hsnj6uHKGnkZCNhsWcEUZEzHOGQ5Xq5GHwodSjDnGjX

Access Token Secret. Ex: Megventure

7. Change the username, consumer key, consumer secret, access token and access token secret fields with the ones you took note.

Step 2: Configuration of the module

1. Open the configuration menu of the module by clicking on Backoffice>Modules>Twitter Timeline Slider>Configuration tab.
2. Select the position you want the slider to be displayed and change the width and height values according to the position you selected.
3. Footer display slides one tweet at a time, while in other positions a twitter carousel of two tweets at a time is displayed.
4. If you limit the tweets, this can diminish the loading time. You can select the tweet number the slider will begin for the footer display.
5. All other options are self-instructive with the help text under regarding options.

Have fun!
